OBJECTIVE

Computer Engineering graduate with hands-on experience in AWS cloud services, Python, backend application development, RESTful API integration, Docker, and Git through internships and academic projects. Proficient in AWS (EC2, S3), SQL, Linux, and SDLC, with a strong interest in cloud infrastructure, automation, deployment, and building reliable, scalable applications.

EDUCATION

Bachelor of Engineering (Computer Engineering)

Indira College of Engineering and Management, Pune

2023 – 2026

CGPA: 9.13/10

Diploma in Information Technology

Pimpri Chinchwad Polytechnic, Pune

2020 – 2023

85.13%

TECHNICAL SKILLS

- Languages:** Python, Java, SQL, JavaScript, C++
- Cloud Platform:** AWS (EC2, S3)
- Backend & APIs:** RESTful APIs, API Integration, Node.js, Express.js
- DevOps & Tools:** Docker (Basics), Git, GitHub, Maven, Postman
- Database:** MySQL, MongoDB, Firebase, SQL Query Optimization
- Core CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, SDLC
- Concepts:** Cloud Computing, Linux Fundamentals, Application Deployment, Backend Development, Agile Methodology

INTERNSHIP

Bluestock Fintech Pvt. Ltd.

Software Development Intern

Jan 2025 – Mar 2025

- Developed backend applications using Python, Java, SQL, and RESTful APIs, contributing to reliable cloud-enabled financial analytics solutions.
- Automated backend data processing by integrating third-party financial APIs, improving application reliability, operational efficiency, and data availability.
- Optimized SQL queries, backend services, and application workflows to improve system performance, scalability, and efficient resource utilization.

PROJECTS

Stock Analytics Platform

Python — AWS — Flask — SQL — REST APIs

- Developed a cloud-enabled stock analytics platform using Python, AWS, SQL, and REST APIs to process and analyze real-time financial market data.
- Integrated external financial APIs and automated backend workflows to improve application availability, scalability, and reliable data processing.
- Optimized SQL queries, backend services, and API communication to improve application performance, resource utilization, and system reliability.
- Applied Git version control, Postman API testing, Docker (Basics), and Agile development practices while building scalable cloud-enabled applications.

PropVista – Intelligent Property Selection System

Java — AWS — Firebase — REST APIs — OpenStreetMap

- Developed a cloud-enabled Android application using Java, Firebase, AWS services, and REST APIs for intelligent property recommendations.
- Integrated Firebase, OpenStreetMap API, Nominatim API, and Overpass API to provide secure real-time synchronization and location-based services.
- Designed scalable backend workflows and optimized database interactions to improve application performance, reliability, and cloud-based data management.

CERTIFICATIONS

- AWS Cloud Practitioner Essentials – AWS Skill Builder

LEADERSHIP & ACTIVITIES

- Placement Coordinator** – Coordinated campus recruitment activities by collaborating with recruiters, faculty, and students, organizing placement drives, facilitating technical communication, and strengthening leadership, teamwork, cross-functional collaboration skills.
- National Service Scheme (NSS) Coordinator** – Led volunteer teams for community service initiatives, environmental awareness campaigns, and social outreach programs, demonstrating leadership, problem-solving, teamwork, and project coordination skills.
- Japanese Language Learner (JLPT N5)** – Pursuing Japanese language proficiency to strengthen cross-cultural communication, continuous learning, and collaboration with global software engineering and DevOps teams.
